

Dear EAEPE member,

We would like to invite you to submit your contribution on the **Research Area [R] – Classical Theory and Policy Analysis** to the 32nd Annual EAEPE Conference **2-4 September 2020**.

Proposals from different economic schools of thought on all topics in line with the agenda of the Research Area (see below) are welcome.

Submissions

Abstracts (from 300 to 750 words) are to be submitted **electronically** using the EAEPE Abstract Submission form.

Please indicate that your paper is intended for *Research Area [R] – Classical Theory and Policy Analysis* on the appropriate dropdown menu

Important dates

Abstract submission deadline: **30 April 2020**

Notification of acceptance: **15 May 2020**

For any information or queries, please contact the Research Area Coordinators, Enrico Sergio Levrero and Franklin Serrano

Description of EAEPE Research Area [R] – Classical Theory and Policy Analysis

The research area [R] aims to reconstruct economic theory and policy analysis along the lines of the classical or surplus approach brought to light again and revived by Piero Sraffa. In particular, it aims to overcome the present-day split between economics and other social sciences and to promote:

- 1) research on the determinants of distribution and capital accumulation along the lines of the surplus approach;
- 2) research on Keynes and the role of effective demand in determining the trend of social product;
- 3) the critique of the modern versions of the theory in terms of demand and supply;
- 4) economic policy proposals that are an alternative to those advanced on the basis of the dominant neoclassical theories;
- 5) discussions with other critical and heterodox approaches;
- 6) studies on the method of analysis adopted by the classical theory and its relationship with Institutionalism.
