

28th Annual Conference of the
European Association for Evolutionary Political Economy (EAEPE) on
**“The role of the State in Economic Development:
State Capacity, State Autonomy and Economic Development”**
19th–21st of October 2017,
Corvinus University of Budapest, Hungary

Call for Papers for the Special Session on

Agent-based macro models and post-Keynesian economics

organized by Research Area H on RA [H] *Effective Demand, Income Distribution and Finance* and RA
[S] *‘Evolutionary Economic Simulation’*

The session explores the overlap between Agent-based modelling and post-Keynesian macroeconomics. It will focus on how agent-based models can be used to examine issues that have been at the core of post-Keynesian economics (such as income distribution, the role of fiscal and monetary policy, the effects of wage policies on growth) and how agent-based modelling can benefit from the tradition of post-Keynesian economics.

How to submit: please go to <http://eaepe.org> , follow the conference submission link, register and select the appropriate item in the submission form.
