

17th EAEPE SUMMER SCHOOL (1–4 July 2024) “ECONOMIC POLICIES FOR AN EQUAL AND JUST GREEN TRANSITION”

Roma Tre University, School of Economics and Business Studies. Via Silvio D'Amico 77, 00145 Rome, Italy

Local organisers: Pasquale Tridico and Sebastiano Fadda

Planet Earth is at a crossroads. Many scientists are raising the alarm that we are closer and closer to the tipping point, facing unprecedented issues in terms of global warming, pollution and biodiversity impoverishment. The anthropogenic causes of this drift are undeniable, and related to a production model that places exploitation at its core. A transition to a more sustainable, inclusive, just and green world is in order. In this regard, however, two further challenges emerge. On the one hand, Governments are implementing policies that are too hesitant (in terms of both size and timing) to address this pressing scenario. On the other hand, the few measures adopted often run the risk of being inequitable, exacerbating the inherently asymmetric and redistributive nature of climate change. The summer school is dedicated to exploring these aspects of public policies for the transition, with a particular emphasis on understanding their socio-economic and welfare implications. By integrating economic principles with a focus on welfare and political economy, the event strives to contribute to a sustainable and resilient future for generations to come. In the spirit of pluralism characteristic of the EAEPE, the lectures will address these important topics from different perspectives and approaches.

The EAEPE Summer School is open to **PhD students** and **early-career researchers** working specifically in the field of institutional and evolutionary analysis, with a special focus this year on ecological economics and welfare. Lecturers will address these important topics from **different perspectives** and **approaches**. Many **Research Areas** are relevant: Social Economics, Public Economics, Macroeconomics, Labour Economics, Effective Demand, Environment-Economy interactions, Economic History, Evolutionary Economics, Comparative Economics, Industrial Policy, Innovation and Technology, etc. More generally, contributions from all fields using institutional, evolutionary, multidisciplinary approaches are welcome. Lectures by internationally renowned scholars will be given in the morning, while afternoons will be devoted to presentations by **advanced PhD students** and **early-career researchers**, who will thus benefit from comments and suggestions from experts in the field.

No Summer School Fee. (50 euros for lunches). Participants are requested to be EAEPE members. For PhD students and those with a gross personal income less than 10,000€ per year a Special Rate Membership is available, at the price of 25€. More information [here](#).

Hotel Accommodation (at Villa Benedetta): Rooms are available, at special prices for the Summer School students. First come, first served policy applies. Rates are the following:

Triple room	106.00 €
Double room	84.00 €
Single room	45.00 €

Deadline for application: 24 May 2024

Successful candidates will be notified by 31 May 2024

Price per room per night, breakfast included, city taxes excluded (6.00 € per night per person).

PhD students can apply by uploading their CV using the [online submission form](#). Advanced PhD students and early-career researchers who would like to present their work can submit their proposal or paper along with their CV using the online submission form.
